

# ISS 2-1/4" ENGINE GAUGES

This quality line of engine gauges will provide an affordable engine monitoring package for experimental aircraft. Hundreds of these gauges are flying today in various homebuilts worldwide. Used extensively in Vans RV line of aircraft. NOTE: Our gauges do not include our company name or logo on the face.

## FEATURES

- 270° Sweep Electric Gauges.
- High Quality Movements in Injection Molded Cases.
- Standard Aircraft 2-1/4" hole & mounting pattern.
- Internally Lit (12V only)
- Clear & sharp lettering with appropriate operating arcs & redlines screened directly on the face.
- Electric design uses transducers & senders. No pressurized fuel & oil in the cabin
- Wires attach with nuts (Included) to 6-32 studs on instrument. No spade fittings.
- Cases have Brass Inserts for the #6 Mounting Screws.
- No Need for Instrument "Grasshopper" nuts.
- Works with Standard Stewart Warner match transducers.
