

WORLD CLASS PRODUCTS

FIRST CLASS SUPPORT WITH **PROSUPPORT**

When you think Audio Control Panels and Intercom Systems - think PS Engineering. Our products incorporate technological innovations that simply are not available in other products.

PS ENGINEERING[®] INCORPORATED

- We are **SPECIALISTS** in audio control. It is not a sideline for us, it's what we do.
- We have introduced industry firsts like our IntelliVox[®] automatic VOX, digital recording, Du-Tel Cellphone Interface and more!
- Exclusive **ProSupport** program enhances our three-year audio panel warranty with guaranteed exchange units and low fixed out-of-warranty repair fees.

NEW

NEW PRODUCT - PMA8000B-MP3

PMA8000B - Automatic VOX, Digital Recorder, Cellphone Input, Built-in MP3 Player

PS Engineering has added a new player to its product line, the PMA8000B-MP3. This Audio Control Panel incorporates all of the capability of the enormously popular PMA8000B, but adds an internal MP3 player that stores up to 1-Gbyte of music. No more forgetting your music at home or dealing with a dead battery. And having it built-in eliminates the clutter of cables in the cockpit.

Files are easily uploaded from a portable USB flash drive. Once the flash drive is connected to the audio panel by the supplied USB cable, pressing the Function and Transfer Keys automatically starts the transfer process. PMA8000B-MP3 will provide friendly audio annunciations to keep the pilot advised of the status and the completion of the transfer. Front panel functions are MP3 On/Off, Skip Forward, Pause, Random, Sequential, and Volume Up/Down. The music is distributed to the crew and passengers according to the pilot controlled configurations, also easily changed 'on-the-fly.'

The PMA8000B MP3 is a slide-in replacement for the exiting PMA8000, PMA8000B, and the GARMIN GMA340 audio control panels, making this a very simple upgrade installation.
