# CHARTCASE PROFESSIONAL SOFTWARE

NEW! CHARTCASE PROFESSIONAL VERSION 6
Top Pick EFB Software by Aviation Consumer
Winner of both 2006 & 2010 EFB Reviews

"Best 3D, Fast Rendering, Highly Configurable"

- The Most Complete EFB Software
- Full-featured Moving Map
- Installs on your Windows computer
- XM/Wx & Zaon XRX Traffic Ready
- Sectional, TAC & Enroute Charts
- Geo-Referenced Approaches & Taxi Charts
- Put the ChartBook engine in your computer!

The complete EFB software solution
Install ChartCase Professional for the "Top Pick" EFB software.* Runs on your Windows PC. Use NACO VFR & IFR charts for planning and to replace paper in your cockpit. Works with many different GPS units. Add WxWorx & Zaon XRX receivers for inflight weather & traffic awareness. Easy to update with your choice of Internet downloads or disk-based subscription plans.

**Use your tablet or notebook computer**
Use your existing computer for the lowest out-of-pocket investment. For the ultimate in convenience, plan your trip using digital charts. Use the same system and enjoy the ease of a paperless cockpit equipped with inflight weather and traffic alerts.

Now Features Traffic Alert & XM/Wx Cockpit Weather
ChartCase Professional Version 6 includes built-in displays for live Traffic alerts for help finding and avoiding traffic. Tested in real-life conditions, Traffic Alert tells you where to look as well as the vertical trend information of your hazard. Tracks your 3 nearest threats with clear & concise graphic markers on screen. XM/Wx shows you the weather, helping you to determine the safest path to your destination.

Includes Real Charts
Use a portable GPS to see your position on Sectionals, TACs, Enroute charts, Approach Plates and Airport Diagrams for the CONUS 48 States included with ChartCase Professional. When you buy ChartCase you have everything you need to get started right away!

All the Best Features
* Comprehensive Flight Planning
* CSC DUATS Service Integration
* State-of-the-Art EFB capabilities
* Unique InFlight user interface
* XM/Wx & Zaon support built-in!
