System requirements

General

- Java 1.4.x Runtime environment (JRE 1.4.x)
  get it here
  (Not yet tested with Sun´s JRE 1.5, Windows Installer will not work without JRE 1.4.x installed.)
- 256Mb RAM
- 250Mb free space in your Hard Disk
- Internet Connection for Database and Application updates

Windows OS

- Windows 98, 2000, XP with Sun´s JRE (does not work properly with Microsoft JRE)
- Pentium III or higher processor (733Mhz or higher recommended)
- Comes with Windows Installer. (Needs JRE 1.4, does not work with JRE 1.5)

Macintosh OS

- Macintosh OS X 10.3 or higher with the most recent Software Updates (Does not work with OS X 10.2.8 or System 9)
- G3 or higher processor (733Mhz or higher recommended)
- Comes in Disk Image for simple Mac-like installation.

Linux and other OS

- Any operating system that supports a fully compliant J2SE 1.4.x JRE
- Comes as a Tarball, with no dependencies.
- Not available online. Please notify that you want this flavor when ordering by sending a mail to ppsupport at onemileup.com
